

## National Commission for Human Development Floods in Pakistan-2010

## Foreword:

The worst floods since 1929 have devastated the lives of more than 22 million people in Pakistan who have lost their homes, livestock and standing crops. The flood has also wrecked major cities, towns and villages, dams, vital roads, rail network, bridges and social service delivery mechanism in over 70 districts. Potential for water borne diseases is high amongst flood victims, particularly 3.4 million children, who are critically prone to gastro, diarrhea and malnutrition.

**National Commission for Human Development (NCHD)** is working in 142 districts in the four provinces, AJK, Gilgit Baltistan, FATA and FRs (less South and North Waziristan) in line with its mandate to support the government in Universal Primary Education (UPE) and Adult Literacy. Through its network, it is working in close coordination with district administration and other stake holders, in flood relief operations in all the flood affected districts of Pakistan. NCHD has had the experience of relief operations in the past during the devastating earth quake of October, 2005, in Mansehra, Balakot and Muzaffarabad. Subsequently, it helped IDPs during the catastrophe in Swat in the areas of Mardan, Charsadda and Swabi, and then more recently it supported relief operations in Atta Abad lake disaster in Gilgit-Baltistan.

NCHD is unremittingly engaged to support the district governments in their effort to provide relief to the people of flood affected areas of Pakistan. Since 30<sup>th</sup> July 2010, when flood hit Charsadda and Nowshera in Khyber Pakhtunkhwa, NCHD has extended its relief operations in all the flood affected districts. It is engaged in emergency rescue, provision of shelter, food, water and emergency medical care for the flood affected people.

**NCHD, being a public private partnership** model, has through its board of Directors of Pakistan Human Development Fund (PHDF), PHDF-UK and American Fund for Human Development (AFHD) secured a pledge of over **Rs. 126 million** to support rescue and relief operations, out of which **Rs. 71.3** million had already been received.

## **Flood Devastation:**

Over **70** districts have been affected by floods throughout the country. Major damages include loss of life, destruction of roads and bridges, telecommunications, water and sanitation facilities, administrative infrastructure, houses, markets, shops, land and standing crops, leaving more than 7 million families homeless. These floods have been termed as the worst floods in the century and its severity has been beyond imagination of the national, provincial and district governments. To evacuate these helpless people and livestock to safer abodes, and to provide them with interim camps, clean drinking water and food, besides essential medicines, to ensure that no epidemic scourges the area, leading to final rehabilitation is in fact a gigantic task and a great challenge not only for Pakistan but for the whole world community.
